UPDATES ON KISOBOKA AFRICA'S AGRIBUSINESS TRAINING FOR YOUTH IN LWENGO

As you may have heard, we recently started a Youth in Agribusiness Training Program at our **Possibility Hub** in Lwengo. This program is currently benefiting 18 youth and is supported by the US Embassy in Uganda through Young African Leaders Initiative(YALI Visibility Fund). They have so far been trained in Design Thinking and Idea generation and it's amazing seeing how much transformation is happening in their lives, thanks to the efforts of the programs's main facilitator, Katende Stephen.

So Why is this exciting?

80% of Uganda's Youth Live in rural areas and most of them depend on agriculture for their livelihoods. Through this **Youth in Agribusiness Program**, these young people are being empowered with the right skills in agriculture value chain processes and management, setting them up for great success and impact in their communities. The potential for youth to thrive in Agriculture is great and we are excited to be partnering with all of you to unlock this potential.

THANK YOU
